

3D TENDER[®]

HIGH PERFORMANCE RESEARCH & DEVELOPMENT

HIGH PERFORMANCE RESEARCH & DEVELOPMENT

HIGH QUALITY 3D TENDER

Semi-rigid polyester hull, aluminum hull, removable floors, ultra-lightweight dinghies with high pressure inflatable hull... The 3D TENDER range offers unrivaled choice of models to value / price on the market

ENVIRONMENT

We pay a great attention to the respect of the environment during the production of 3D Tender boats. We make sure to use non-polluting process, energy economic respecting the health of employees and users. The choice of raw materials is also crucial since it allows to build very strong but also close to nature boats.

FEATHERWEIGHT 3D TENDER

The aluminum hull boats bring their strength while giving them an unbeatable advantage in terms of weight. These boats can be powered by small engines, cheaper, more fuel efficient, reducing their CO₂ emissions.

ALUMINIUM 3D TENDER

Aluminum is one of the only materials that can be recycled so without losing its unlimited qualities and properties .

3D Tender chose to use powder paint. These powders are electrically charged and are sprayed onto the prepared surfaces before placing in the oven. The finish is impeccable, the painted surfaces are smooth and shiny.

The powder paints bring considerable advantages compared to paintings conventional liquid:

- No volatile organic mixture
 - No solvent (no disk of the sun , pollution, etc...)
 - No pollution, excess powder is easily collected by suction
- Time and curing temperature were significantly improved in order to reduce energy consumption of the process.

TESTS CONDUCTED ON PAINTING

- Adhesion of primer (BS EN 12206-1)
- Thickness of coatings (ISO 2178)
- Grip paint / support (ISO 2409 and ISO 4624)
- Accelerated UV (ISO 11507)
- Accelerated salt spray (ISO 9227)
- Resistance to impact (ISO 6272)

TESTS CONDUCTED ON TISSUES AND ASSEMBLIES

- Mechanical properties (ISO 1421, ISO 4674 and ISO 2411)
- Assemblies Resistance to heat (ISO 6185)
- Sealed floats (ISO 6185)
- Accelerated UV (ISO 4892)

PATROL

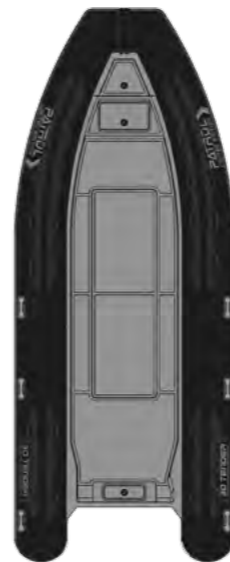

LIMITED EDITION

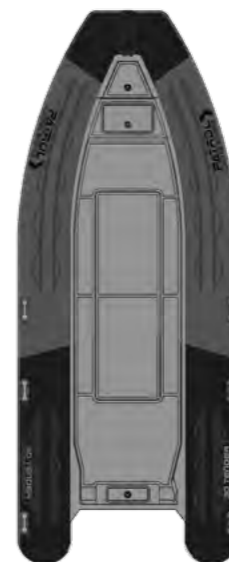

3D TENDER[®]
HIGH PERFORMANCE RESEARCH & DEVELOPMENT

Patrol **Limited edition**

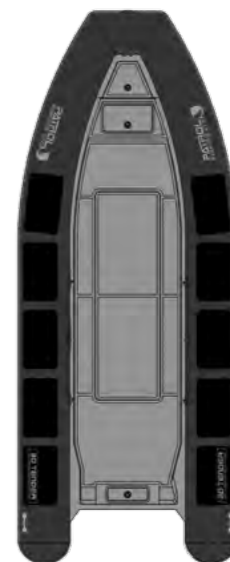

With the success of the PATROL range, which is highly regarded for its performance in all conditions, 3D TENDER decided this year to develop this range by designing four different models all available in five sizes, from 530 to 650 cm, in order to satisfy everybody's needs.

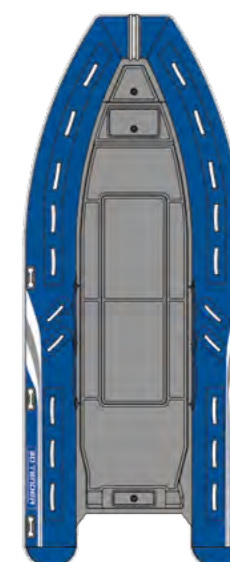

BLACK
PVC Melher Black

HYPALON
Hypalon Orca

FISHING
PVC Melher Grey

FAMILY
PVC Melher Blue

Four models available in five sizes:
530 - 550 - 560 - 600 - 650 (cm)

Patrol Limited edition

The **Patrol Limited edition** are considered as the elite of semi-rigid in our range. It comes in 5 sizes all made of **PVC Mehler Valmex® Technology** (German fabric) thermo-welded or glued hot also available in **Hypalon Orca Pennel & Flipo**.

Thanks to the study of specific environmental constraints and research performance, the **Patrol Limited edition** was developed for professionals who want a boat to all events, tailored precisely to their requirements and needs.

Outsized reliability, with unmatched performance and capacity without limit.

Range suitable for Special Forces, rescue organizations, but also offshore industries, integration on yachts or expeditions and adventures).

STANDARD EQUIPMENT

- Fabric PVC Melher technology Valmex® glued
- Anchor well
- Front box
- Lifting points & towing eyes
- Anti-slip deck
- Double Heavy duty rubbing strake
- Length keel guard
- Pump, paddles & repair kit
- Console & driver seat
- Double lifelines
- Carry handles
- Reinforcement of cones
- Retractable Cleat
- Pump, Repair kit

XPRO

RIB Aluminium

3D TENDER[®]
HIGH PERFORMANCE RESEARCH & DEVELOPMENT

XPRO RIB Aluminium

The XPRO RIB range includes 7 models all made of PVC Mehler Valmex® Technology (German fabric) thermo-welded or glued hot also available in Hypalon Orca Pennel & Flipo.

Combining a sporty and elegant design XPRO RIB is ideal for those who need a comfortable, lightweight boat. Each model is equipped with a rugged aluminum hull with a double floor and a front locker for storing the nurse (360, 390, 415).

These boats can achieve a good cruising speed with small engines and offer an important and significant fuel economy

STANDARD EQUIPMENT

- Fabric PVC Melher technology Valmex® glued or welded seams
- Inflation valves
- Aluminum hull, anti corrosion treated
- Marine paint on aluminum powder
- Anchor well
- Front locker from 360 cm
- U-bolts of lifting and towing integrated to the hull
- Slip coating UV resistant marine
- Ultra wide band chafing
- Protection bow
- Double References
- Aluminum bench slide
- Pump, oars, repair kit

ULTRA LIGHT

RIB Aluminium

30 TENDER[®]
HIGH PERFORMANCE RESEARCH & DEVELOPMENT

ULTRA LIGHT RIB Aluminium

Semi rigid tender with ultra light aluminium hull!

The **Ultra Light RIB** range is available in seven models all made of **PVC Mehler Valmex® Technology** (German fabric) thermo-welded or glued hot also available in **Hypalon Orca Pennel & Flipo**.

Very light, with a very pronounced V shape that provides stability and exceptional passing through the waves and a navigation dry. Hull designed to withstand shock and abrasion associated with rocks, coral and sandy beach. Models above 330 cm are equipped with a front locker to store your nurse.

Incredibly rugged and lightweight!

STANDARD EQUIPMENT

- Fabric PVC Melher technology Valmex® glued or welded seams
- Inflation valves
- Aluminum hull, anti corrosion treated
- Marine paint on aluminum powder
- Anchor well on all hypalon models and on PVC models from 330 cm
- Front locker from 310 cm
- U-bolts of lifting and towing integrated to the hull
- Marine anti-skid surface, UV resistant
- Ultra wide band chafing
- Protection bow
- Aluminum bench
- Bag under bench
- Pump, oars, repair kit

ALUMINIUM SEMI-RIGID

FAST LINE

Foldable transom

The **Fast Line** has been specially created to facilitate the storage of your tender with its engine. A simple manipulation allows you fold the transom in order that the engine do not exceed from the dimensions of the boat. Your tender can then be easily stored in a trunk or on the deck of your boat.

The hull is built in aluminium with a flat deck to ensure light weight and solidity. The V-shape of the hull also allows good speed and confort in all weather conditions.

STANDARD EQUIPMENT

- Foldable transom
- Fabric PVC Valmex®, Mehler Technologie glued or welded seams
- Inflation valves
- Aluminium hull, anti corrosion treated
- Marine paint on aluminium powder
- U-bolts of lifting and towing integrated to the hull
- Marine anti-skid surface, UV resistant
- Ultra wide band chafing
