3D TENDER
Quality boats don't have to be expensive!

WELCOME
TO X PRO AND
3D TENDER

X PRO VALUE

The X PRO Defender range of RIBs from 4 metres through to 6 metres offer the best value available today. Fantastic build quality and robust styling give you the confidence you need to go those extra miles. Dry riding hulls, agile handling, practical styling and bespoke fit out options will ensure that the reputation of the X PRO Defender continues to grow.

QUALITY, AFFORDABLE

From a 1.6 metre light weight tender through to a 6 metre RIB, 3D Tender and X PRO have a boat that will suit your needs and more importantly, your budget. Air decks, Fibreglass and Aluminium hulls are all found within our product range and we assure quality, durability and value for money across the board.

The superlight tender range is the lightest in the World today and offers a 2 metre tender weighing in at just 12 kg that fits in a backpack!

The Lightweight Aluminium RIB range offers a well built genuine RIB from 2.5 metres through to 3.1 with a starting weight of just 27 kg! Ideal for lightweight davits and very easy to move around, even with an engine fitted.

RIBS & INFLATABLES

The X PRO Aluminium RIB range from 2.5 metres through to 4.2 metres boasts exceptional build strength and a fabulous hull design. A Reinforced flat deck offers comfort and rigidity, welded lifting points throughout the range make the X PRO Aluminium Rib one of the best all-rounders available today. The 420 defender is known to be at the very top level of sea keeping and build quality.

The X PRO Commando range offers the strongest and most robust inflatable boat available today. An Aluminium slatted floor, extremely robust tubing and a Full extras pack, including, seat bags, bow spray hood and cover make these ideal craft for divers, fisherman, families and professional organisations, a model from 3.2 metres up to 5.5 metres will suit most needs.

OUR FABRIC OPTIONS

PVC - Valmex® from Mehler Technologies

Our PVC fabric is specifically treated to provide good resistance to UV damage. These fabrics are hand glued with a two-part adhesive (polyurethane glue mixed with RC hardener). Base cloth is a high tenacity VALMEX polyester and thickness is 0.9mm and 1.2mm.

Hypalon - ORCA® from Pennel & Flipo

These fabrics are extremely resistant to tough conditions presenting excellent resistance to UV, hydrolysis and hydrocarbon. They are hand glued with a specific two-part adhesive (neoprene glue mixed with RFE hardener). Thickness 0.75mm, 0.85mm, 1mm and 1.2 mm.

OUR CONFORMITY

Each boat in our range has passed very stringent European safety testing, including drop tests and pressure tests. CE certification is in place for **EVERY** model that we supply.

WELCOME
TO X PRO AND
3D TENDER

OUR FACTORY

Our State of the art facility is the envy of most boat manufacturers, high tech cutting and seam welding machines, extreme quality control and an attention to "European" detail standards ensure that you will receive a robust, well built craft that will stand up to the rigours of UK use.

X PRO DEFENDER RANGE

DEFENDER RIB

With sizes from 445cm – 590cm, this range of Rigid inflatable boats has a model for everyone. Stylish colour scheme and an exceptional hull design mean that you will look good and feel good on the water. Our deep V hull will smooth out the chop and the stability offered by the high set tubing will keep you feeling safe even in more difficult conditions.

These RIBs are very versatile and are being used today across Europe as Dive boats, support boats, rescue craft, regatta support, fishing, skiing, toys, cruising, navy training craft, RYA training boats and a typical family

pleasure boat. A 50hp four stroke engine will push you through the water at 30 knots, so you can still enjoy great performance whilst running an economical engine, an important advantage when today's fuel costs are taken into account.

All our Defender Ribs are supplied as standard with full console including forward facing seat, drivers bolster, HD over all winter/ storage cover a pump and set of oars, they are all supplied with professional grade VALMEX PVC tubes and ORCA Hypalon is an optional extra.

X PRO DEFENDER RANGE

X PRO DEFENDER ALUMINIUM RANGE

DEFENDER ALUMINIUM RIB

260 cm – 420 cm This range of boats is simply fantastic. We are confident that you will not find a better value small RIB in the UK today.

G4 Aluminium Hull, designed and tested in the harshest conditions makes this range of boats punch well above their weight. High set VALMEX tubing and a deep V hull entry will give you a dry and smooth ride in challenging conditions.

The smaller models are great as tenders, towing and lifting eyes are welded into the hull and the keel protection band will give you

piece of mind when running up the beach. Extremely lightweight and robust these boats are very easy to handle and will serve you well. Fishing, towing toys, cruising in comfort, divers, free divers, rescue, sailing support, cadet training and as a tender are just some of the uses that the X PRO handles with ease.

The X PRO Aluminium 420 PACK is supplied with a double jockey console with backrests and an optional rear bench is available. Whether you are looking for a tough, easy to handle tender or an offshore working Rib, the X PRO aluminium range has a model that will meet your requirements.

X PRO DEFENDER ALUMINIUM RANGE

FEATURES & BENEFITS

All our X PRO Defender Aluminium boats are supplied with VALMEX tubing for excellent resistance to UV and saltwater degradation. In addition they come with a full HD winter/storage cover, pump and oars.

Welded davit lifting eyes, 2 welded towing eyes for toys, double rubbing strakes with spray deflectors, double hand hold lines, 7 carry/mooring handles and an aluminium slider bench seat over a non skid deck. This is an excellent offshore boat and has been tested in very harsh conditions.

X PRO COMMANDO RANGE

X PRO COMMANDO

The X PRO Commando Black is a fold away range of boats with a non slip aluminium floor and inflatable keel as standard across the range.

This boat is superbly built and is designed for the harshest of use.

We believe that the VALMEX material used in its construction gives you a much more robust boat than most competition currently available. In addition, the inflatable keel gives you the stability and handling of a real boat. The full package of options that comes

with the Commando, including 2 adjustable benches with underseat storage bags, bow bag, bow tent, overall cover and carry sacs has all your needs covered.

Features such as tow eyes, lifting points, 7 lift handles, reinforced tubing, great styling and a real professional feel make this the best fold away boat available on the market today.

X PRO COMMANDO RANGE

FEATURES & BENEFITS

The advantage of the commando range is that fact that they are supplied with ALL extras as standard, bow storage bag, two aluminium bench seats on sliders with under seat storage bags and a bow spray cover are all included in the price.

The jet black colouring will ensure you turn heads wherever you go.

These are fantastic inflatable boats and offer the best value for money available in the UK today, build to withstand being dropped from a navy aircraft they will handle anything you throw at them.

X PRO LIGHTWEIGHT ALUMINIUM

X PRO LIGHT ALUMINIUM

Tested in the sailing press, the lightweight aluminium range consistently comes top of class. They ride better, stay dryer and offer a better finish than the competition and are truly market leading. They are so easy to handle starting at just 27kgs! And a dream for davit use thanks to 3 internal welded lifting points.

Our Leisure range of aluminium tenders look great and work very well as a tender or small boat.

The G4 aluminium hull is very well designed and beaching will not pose a problem due to the keel protection band fitted as standard to all our aluminium RIBs.

Non skid deck patches and an adjustable aluminium bench seat help you remain comfortable at sea and an all over cover is supplied as standard as are oars a pump and repair kit.

X PRO LIGHTWEIGHT ALUMINIUM

FEATURES & BENEFITS

Robust yet extremely light and very good looking. These tender RIBs will give you reliable and easy everyday usage.

Available in a range of colours

X PRO SUPERLIGHT TWIN AIR RANGE

X PRO SUPERLIGHT

What can we say about the Twin air tender range? Quite simply the lightest airdeck tender on the market today by far.

The 230 airdeck weighs just 13Kgs!

This range has been designed to scrap the heavy and hard to carry tenders we use today, bulky, hard to stow and usually difficult for a single person to manage.

The twin air tender is actually supplied in a back pack style carry bag and will stow easily in most lockers saving space and most importantly weight. The honeycombe high pressure airdeck gives you rigidity and the aluminium bench seat on adjustable sliding rails gives you the comfort and adaptability you need.

X PRO SUPERLIGHT TWIN AIR RANGE

FEATURES & BENEFITS

Remember, these tenders are made from high quality materials and it has taken us over 2 years to develop such a lightweight range but we have done it and maintained the usual 3D qualities.

Available in Black 0.5mm mehler or grey 0.9mm mehler (for grey boats add 20% to weight figures due to thicker material)
