

PATROL 670

RIB'S
FIBERGLASS HULL

The high-performance hull of the boat gives it an exceptional passage at sea. The Patrol's deep-V composite hull, wide chines and large diameter tubes, provide excellent maneuverability and stability on the water, resulting in unparalleled onboard safety. The Patrol 670 is a fully modular boat, you can choose to position all the optional equipment (Console, Bolster Seat, Bench...) wherever you want. This modularity makes it possible to meet the needs of both professionals (firefighters, coastguards) and individuals (Pleaseure and fishing).

The specific shape of the hull makes it the perfect boat for professional looking at reaching higher speed at the sea

The boat is available in PVC Melher or in HYPALON ORCA® fabric from the Belgian company, Pennel and Flipo and with division 222.
